DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Davis A. Fox, Reg. No: 38,807 on 10/20/2005.

The application has been amended as follows:

In The Claims:

1. – 4. (Canceled)

5. (Amended) A process method for validating a roaming user who seeks access to a communications network operated by a first service provider, the process comprising:
determining that the user is associated with a second service provider;
requesting registration data for the user to the second service provider; and
validating or invalidating the user based on the registration data from the second service provider, the registration data identifying a status of the user and whether authentication of the user is required to validate the user;

wherein requesting registration data comprises requesting the registration data for the user within a predetermined period;

wherein validating or invalidating the user comprises invalidating the user regardless of the result of the registration data from the second service provider when the registration data is not received from the second service provider within the predetermined period.

6. (Original) The method of claim 5, wherein said authentication is performed by the user entering a PIN.

7. (Original) The method of claim 5, further comprising instructing the network of the first service provider to cancel the user's registration when the user is invalidated.

Art Unit: 2681

8. (Original) The method of claim 5, wherein the registration data includes an authorization period of the user in the first service provider.

9. – 10. (Canceled)

11. (Original) The method of claim 5, further comprising requesting a Personal Identification Number to the user before providing a service to the user, when the user is validated.

12. (New) A method for validating a customer of an international or other selected service provider, where the customer is attempting to use a communications network comprising at least a Mobile Switching Center ("MSC") and Visitor Location Register ("VLR"), the process comprising:

receiving registration notification data from a particular customer;

determining whether the customer is associated with a selected service provider;

formulating at a Service Control Point ("SCP") a request for registration notification to a Home Location Register ("HLR") of the customer;

receiving at the SCP information pertaining to the customer's validation, including a status of the user and whether authentication of the user is required to validate the user; and

forwarding from the SCP to the VLR either customer validation data or a request to cancel the customer's registration within the VLR;

wherein receiving at the SCP information pertaining to the customer's validation comprises receiving at the SCP information pertaining to the customer's validation within a predetermined time period;

wherein forwarding from the SCP to the VLR either customer validation data or a request to cancel the customer's registration within the VLR comprises forwarding the request to cancel the customer's registration with the VLR when the SCP does not receive the information within the predetermined time period.

13. (Original) The method of claim 12, wherein said authentication is performed by the user entering a PIN.

14. – 15. (Canceled)

16. (Original) The method of claim 12, further comprising requesting a Personal Identification Number to the customer before providing a service to the customer, when the SCP forwards to the VLR the customer validation data.

Allowable Subject Matter

2. Claims 5-8, 11-13 and 16 are allowed.

The following is an examiner's statement of reasons for allowance: 5-8, 11-13 and 16.

With respect to claim 1, Adamany (U.S. Patent 6,615,041 B2) is the closest prior art to the application invention, which discloses a method for validating a roaming user who seeks access to a communications network operated by a first service provider (See Title, Abstract, Page 2, Paragraph [0012], Home system, MSC-H, Fig. 1), determining that the user is associated with a second service provider (See Co. 3, Lines 28-42, Visited system, MSC-V, Fig. 1); requesting registration data for the user to the second service provider (See e.g. Co. 9, Lines 7-24).

Lee (U.S. Patent 6,006,094), discloses method of routing an international call to a foreign mobile subscriber.

Lantto (U.S. Patent 5,610,974), discloses method and arrangement for handling a mobile telephone subscriber administered in different mobile telephone networks with a common call.

However, the prior art of record fails to disclose singly or in combination or render obvious validating or invalidating the user based on the registration data from the second service provider, the registration data identifying a status of the user and whether authentication of the user is required to validate the user; wherein requesting registration data comprises requesting the registration data for the user within a predetermined period; wherein validating or invalidating the user comprises invalidating the user regardless of the result of the registration data from the second service provider when the registration data is not received from the second service provider within the predetermined period.

With respect to claim 12, the prior art of record fails to disclose singly or in combination or render obvious that forwarding from the SCP to the VLR either customer validation data or a request to cancel the customer's registration within the VLR; wherein receiving at the SCP information pertaining to the customer's validation comprises receiving at the SCP information pertaining to the customer's validation within a predetermined time period; wherein forwarding from the SCP to the VLR either customer

Art Unit: 2681

validation data or a request to cancel the customer's registration within the VLR comprises forwarding the request to cancel the customer's registration with the VLR when the SCP does not receive the information within the predetermined time period.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a) Daniels (U.S. 6,058,301).
 - b) Suzuki (U.S. 6,041,231).
 - c) Wiehe (U.S. 6,035,198).
